Three gaps we found

No ready WhatsApp message and no starting price.

The WhatsApp button opens an empty chat and no service shows a price, so many visitors leave instead of writing.

One page for every service and area.

Split AC cleaning, duct cleaning and contracts share one English-only page. A buyer searching “AC duct cleaning Dubai”, or in Arabic, finds no page made for that need.

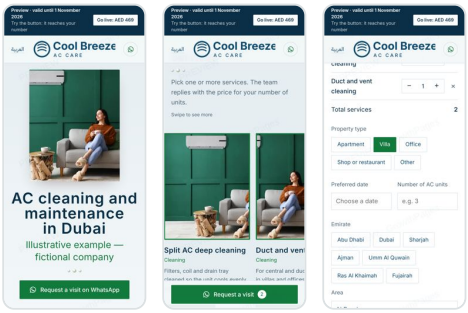

No answers to the common questions.

How often to clean, what is included, which areas you serve: none of this is written on your channels, so Google and AI assistants have nothing to quote about you.

Your strongest asset. Reviews mention fast replies and tidy technicians. The new page puts that trust next to the booking button.

What your new page does

- One focused sales page for AC cleaning and maintenance, in Arabic and English, for apartments, villas and offices.
- A booking planner that writes the WhatsApp message for the customer: service, property, units, area, date.
- Quotable answers to common questions, with structured data, so Google and AI assistants can mention you.
